Forecast for Monday 28 Jun 2021

Weather: A largely clear start to the day, which might allow the odd shallow mist patch to develop in the valleys first thing. Cloud then builds through the second half of the morning, potentially also associated with some light rain for a time. This rain will largely fade away by midday, with just isolated patches occurring through the rest of the day. It will remain cloudy through the evening and into the night.

Chance of cloud free mountain/hill tops above 800m: 90% through the morning, dropping to 60% from midday.

Visibility: Good visibility through the morning. Scattered cloud bases falling to 300-400m through the afternoon and evening, bringing periods of poor visibility for summits and higher slopes.

Meteorologist's View

Care should be taken on the higher summits in the afternoon with cloud reducing visibility on a varying basis. Although it will be a rather cloudy and overcast day, it is important that you remember to stay hydrated when out on the hills.

Forecast for Tuesday 29 Jun 2021

Weather: Remaining predominantly cloudy on Tuesday morning, with the risk of isolated light showers first thing. Some brighter spells breaking through at points, more prominently in the late afternoon and evening, when it will also be dry.

Maximum wind: Winds on the summits will be northeasterly 12 mph, gusting 20 mph.

Chance of cloud free mountain/hill tops above 800m: 70% through the day.

Visibility: Largely good visibility of surrounding hills through the day. Most cloud remaining above the summits, but scattered amounts dropping to 400-500m throughout the day, bringing temporary periods of poor visibility to higher slopes.

Temperature: **Valleys:** Plus 12 Celsius to plus 19 Celsius.
At 800m: Plus 9 Celsius to plus 12 Celsius.
Freezing level: Above the summit all day.
